PROJECT TIMELINE

STEP 1: INITIAL CONVERSATION

Our assistant will get an idea of what you're envisioning for your landscaping project and schedule a consultation with one of our specialists.

STEP 2: CONSULTATION

Your landscaping expert will visit your property to assess the space, discuss your goals, and take measurements to develop a customized plan.

STEP 3: ESTIMATE/QUOTE/DESIGN

We will create a landscape design using our software to provide a 3D model of your project. If a design isn't needed, we'll provide an estimate and finalize your quote.

STEP 4: FINE TUNE

We'll review your estimate, discuss any adjustments, and ensure all details align with your vision before moving forward.

STEP 5: APPROVAL/DOWN-PAYMENT

Once we receive your approval and down-payment, we'll officially add your project to our schedule.

STEP 6: PLANNING

As we prepare for installation, we will coordinate necessary approvals, order materials, and schedule our crew for your landscaping project.

STEP 7: PROJECT DAY PREP

Our team will begin delivering materials and organizing equipment to ensure everything is ready for your project.

STEP 8: PROJECT DAY IS HERE!

The transformation begins! Our team will bring your vision to life. Expect some noise and dust, but the end result will be worth it!

STEP 9 & 10: COMPLETION & WALK-THROUGH

Once the work is complete, we will clean up the site and conduct a final walk-through to ensure your satisfaction with the finished project.
